IMPORTANT SAFETY INSTRUCTIONS

ALWAYS BE CAREFUL WHEN USING YOUR GXTV. TO REDUCE THE RISK OF FIRE, ELECTRICAL SHOCK AND OTHER INJURIES, KEEP THESE SAFETY PRECAUTIONS IN MIND WHEN INSTALLING, USING AND MAINTAINING YOUR MACHINE.

- Read all safety and operating instructions before operating the GXTV.
- Retain the safety and operating instructions for future reference.
- Heed all warnings on the GXTV and in the operating instructions.
- Follow all operating and use instructions.
- Unplug the GXTV from the wall outlet before cleaning. Use a damp cloth; do not use liquid or aerosol cleaners.
- Never add any attachments and/or equipment without approval of the manufacturer. Such additions may result in the risk of fire, electrical shock or other personal injury.
- Do not place the GXTV where contact with or immersion in water is a possibility, such as near bathtubs, sinks, washing machines, swimming pools, etc.
- Do not place the GXTV on an unstable cart, stand, tripod, bracket or table. The GXTV may fall, causing serious injury to a child or adult and serious damage to the appliance. Use only with a cart, stand, tripod, bracket or table recommended by the manufacturer or sold with the GXTV. Follow the manufacturer's instructions when mounting the unit and use a mounting accessory recommended by the manufacturer. Move the GXTV and its cart with care. Quick stops, excessive force and uneven surfaces may cause the unit and cart to overturn.

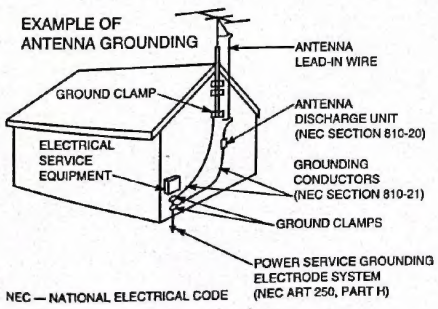
- Provide ventilation for the GXTV. The unit is designed with slots in the cabinet for ventilation to protect it from overheating. Do not block these openings. Do not place the GXTV on a bed, sofa, rug or other similar surface. Do not place it near a radiator or other source of heat. If you place the GXTV on a rack or bookcase, ensure that there is adequate ventilation and that you've followed the manufacturer's instructions for mounting.
- Operate your GXTV only from the type of power source indicated on the marking label. If you are not sure of the type of power supplied to your home, consult your appliance dealer or local power company.
- Use only a grounded or polarized outlet. For your safety, this GXTV is equipped with a polarized alternating current line plug having one blade wider than the other. This plug will fit into the power outlet only one way. If you are unable to insert the plug fully into the outlet, try reversing the plug. If the plug still does not fit, do not force it. Contact your electrician to replace your outlet.
- Protect the power cord. Power supply cords should be routed so that they are unlikely to be walked on or pinched by items placed on or against them. Pay particular attention to cords at the plug, near convenience receptacles and at the point where they exit from the unit.
- Unplug the GXTV from the wall outlet and disconnect the antenna or cable system during a lightning storm or when left unattended and unused for long periods of time. This will prevent damage to the unit due to lightning and power line surges.

Avoid placing an outside antenna system in the vicinity of overhead power lines or other electrical light or power circuits or where it can fall into such power lines or circuits. When installing an outside antenna system, be extremely careful to keep from touching the power lines or circuits. Contact with such lines can be fatal.

Do not overload the wall outlet or extension cords. Overloading can result in fire or electrical shock.

Do not insert foreign objects through openings in the unit as they may touch dangerous voltage points or damage parts. Never spill liquid of any kind on the GXTV.

Ground outdoor antennas. If an outside antenna or cable system is connected to the GXTV, be sure the antenna or cable system is grounded so as to provide some protection against voltage surges and built-up static charges. Section 810 of the National Electrical Code, ANSI/NFPA No.70-1984, provides information with respect to proper grounding of the mast and supporting structure, grounding of the lead-in wire to an antenna discharge unit, size of grounding conductors, location of antenna discharge unit, connection to grounding electrodes and requirements for the grounding electrode.



Do not attempt to service the GXTV yourself. Refer all servicing to qualified service personnel. Unplug the unit from the wall outlet and refer servicing to qualified service personnel under the following conditions:

- when the power supply cord or plug is damaged
- if liquid has been spilled on the unit or if objects have fallen into the unit
- if the GXTV has been exposed to rain or water
- if the GXTV does not operate normally by following the operating instructions
- if the GXTV has been dropped or the cabinet has been damaged
- when the GXTV exhibits a distinct change in performance

If you make adjustments yourself, adjust only those controls that are covered by the operating instructions. Adjusting other controls may result in damage and will often require extensive work by a qualified technician to restore the GXTV to normal.

When replacement parts are required, be sure the service technician uses replacement parts specified by the manufacturer or those that have the same characteristics as the original part. Unauthorized substitutions may result in additional damage to the unit.

Upon completion of any service or repairs to this GXTV, ask the service technician to perform safety checks to determine that the GXTV is in safe operating condition.

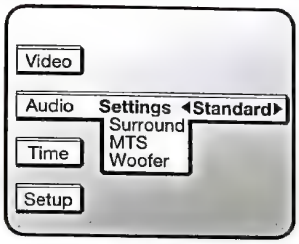
Using Special Audio Features

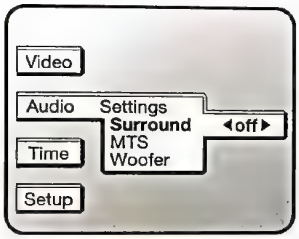
Your GXTV has special features that increase its audio performance. The Surround Sound feature allows you to simulate the surround effects found in movie theaters and the Multichannel Television Stereo (MTS) feature allows you to listen to one of several audio soundtracks.

Using Surround Sound

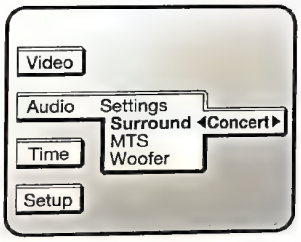
Your Samsung GXTV can create a "surrounding" sound effect that makes your GXTV's sound seem to come from all around you. The Surround Sound feature can also make a mono signal sound like a stereo signal.



1. Press **MENU** repeatedly until you see the Audio menu.



2. Press **CH▼** to select "Surround."



3. Press **VOL◀** or **VOL▶** to change the Surround setting.

   You can choose between "Off," "Mono," "Concert" and "Stadium."

THE "CONCERT" AND "STADIUM" MODES ONLY WORK WHEN THE CHANNEL YOU ARE WATCHING IS BROADCASTING A STEREO SIGNAL.

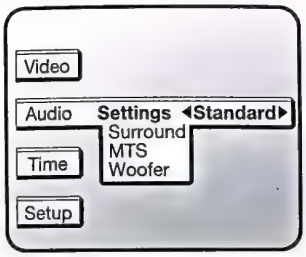
THE GXTV HAS CERTAIN PERFORMANCE OPTIONS AND TACTICAL MODES OF INFORMATION DEPLOYMENT. PART 4 GIVES YOU HINTS ON HOW TO ACCESS THE MORE COMPLEX ASPECTS OF YOUR VENTURE INTO GXTV LAND. BE WARNED, THIS ZONE IS THE MOST TREACHEROUS OF ALL!

- CHOOSE "OFF" IF YOU DON'T WANT TO USE THE SURROUND EFFECTS.
- CHOOSE "MONO" WHEN YOU ARE WATCHING PROGRAMS BROADCAST IN MONO; YOUR GXTV WILL CREATE A SIMULATED STEREO EFFECT FROM THE MONO SIGNAL.
- CHOOSE "CONCERT" WHEN WATCHING MUSIC PROGRAMS; THE GXTV WILL CREATE A SURROUND EFFECT THAT SIMULATES A CONCERT HALL. (IN GAME MODE, THIS PRESET WILL BE CHANGED TO "ROADRACE").
- CHOOSE "STADIUM" WHEN VIEWING SPORTS PROGRAMS; THE GXTV WILL CREATE A SURROUND EFFECT THAT SIMULATES A STADIUM. (IN GAME MODE, THIS PRESET WILL BE CHANGED TO "WARZONE").

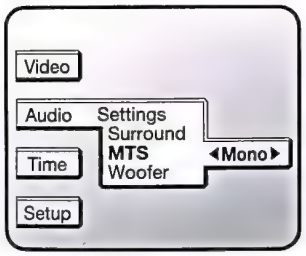
Choosing a Soundtrack

When you are watching a program that is broadcast in stereo, you can set your GXTV to play the soundtrack in stereo or in mono. Additionally, some stations broadcast a Separate Audio Program (SAP). SAP programs are usually versions of the program in another language or they sometimes carry additional information like news or weather. You can set your GXTV to play these SAP programs.

TV stations can broadcast these different soundtracks because they use Multichannel Television Sound, or MTS. We call these settings "MTS" settings.

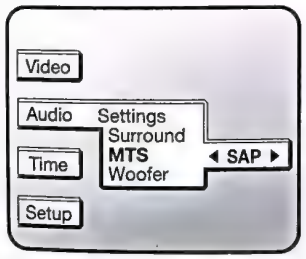


1 Press **MENU** repeatedly until you see the Audio menu.



2 Press **CH▼** to select "MTS."

NOTE: YOU CAN SELECT "MTS" IN THE TV MODE ONLY.



3 Press **VOL◄** or **VOL►** to change the MTS setting.

You can choose between "Mono" "Stereo," and "SAP."

- CHOOSE "MONO" IF THE CHANNEL IS BROADCASTING IN MONO OR IF YOU ARE HAVING DIFFICULTY RECEIVING A STEREO SIGNAL.
- CHOOSE "STEREO" FOR NORMAL VIEWING OF CHANNELS BROADCASTING IN STEREO.
- CHOOSE "SAP" WHEN YOU WANT TO LISTEN TO THE SEPARATE AUDIO PROGRAM, WHICH IS USUALLY A SOUNDTRACK IN ANOTHER LANGUAGE.

To adjust the speaker doors for optimum stereo sound:

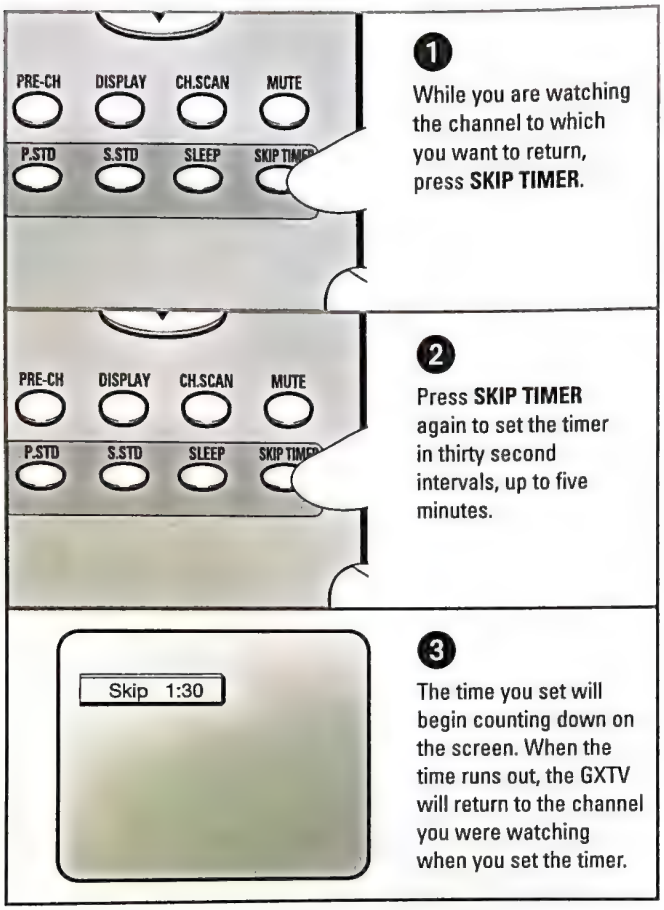
You can set the Skip Timer to "2 minutes," then switch channels. After 2 minutes, your GXTV will return to the original channel. To use the Skip Timer:



1. While you are watching the channel to which you want to return, press **SKIP TIMER**.

THE ON-SCREEN DISPLAY WILL READ "SKIP OFF."

2. Press **SKIP TIMER** again to set the timer in thirty second intervals, up to five minutes.

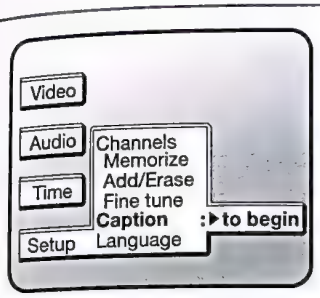
Viewing Closed Captions

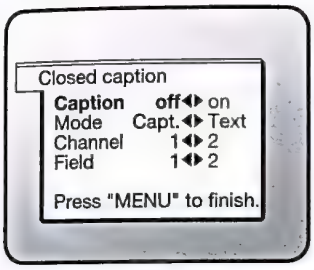
Your GXTV decodes and displays the closed captions that are broadcast with some television shows. These captions are usually subtitles for the hearing impaired or translations into another language. All VCRs record the closed caption signal from television programs, so home-recorded video tapes also provide closed captions. Most pre-recorded commercial video tapes provide closed captions as well. Check for the closed caption symbol CC in your television schedule and on the tape's packaging.

To turn on Closed Caption:

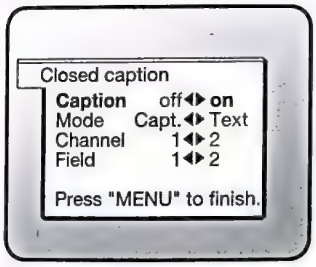


1 Press **MENU** repeatedly until you see the Setup menu.

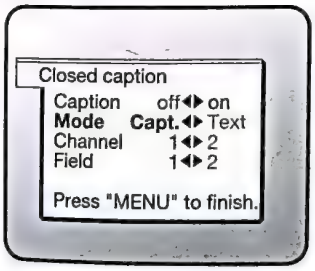
Press **CH ▼** to select "Caption."



2 Press **VOL ▶** to open the Closed Caption menu.



3 Press **VOL ▶** to turn closed captioning on.



4 Press **CH ▼** to highlight "Mode."

Press **VOL◀** or **VOL▶** to choose "Capt." (captions) or "Text."

MISSPELLING AND UNUSUAL CHARACTERS SOMETIMES OCCUR IN CLOSED CAPTION TRANSMISSIONS, ESPECIALLY THOSE OF LIVE EVENTS. THERE MAY BE A SMALL DELAY BEFORE CAPTIONS APPEAR WHEN YOU CHANGE CHANNELS. THESE ARE NOT MALFUNCTIONS OF THE GXTV.

IN CAPTION MODE, CAPTIONS APPEAR AT THE BOTTOM OF THE SCREEN AND THEY USUALLY COVER ONLY A SMALL PORTION OF THE PICTURE. IN TEXT MODE, INFORMATION UNRELATED TO THE PROGRAM, SUCH AS NEWS OR WEATHER, IS DISPLAYED. TEXT OFTEN COVERS A LARGE PORTION OF THE SCREEN.
